the 1990s, and the 1990s have been a period of rapid growth in the number of people who have been diagnosed with autism (APA 2000).

There are several reasons why the prevalence of autism has increased. First, there has been a change in the way autism is diagnosed. In the past, autism was often diagnosed only in children who had severe symptoms, such as a lack of language and social skills. Now, however, autism is diagnosed in children who have a wide range of symptoms, including children who have mild symptoms and children who have severe symptoms.

Second, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Third, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Fourth, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Fifth, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Sixth, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Seventh, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Eighth, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

Ninth, there has been an increase in the number of people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism. This is because there are now more people who are being diagnosed with autism, and there are now more people who are being diagnosed with autism.

1. The first step is to identify the problem or goal. This involves understanding the current situation and what needs to be achieved.

2. The second step is to generate ideas. This involves brainstorming and exploring different solutions or approaches.

3. The third step is to evaluate the ideas. This involves comparing the different options and determining which one is the most feasible and effective.

4. The final step is to implement the chosen solution. This involves putting the plan into action and monitoring progress.
